

I support the Petition for Reconsideration of the Rule for Broadband over Power Line (BPL) filed on 11 December 2004 by Cortland Richmond in the Docket 04-37. It is incumbent upon the FCC commissioners to respond in good faith to the Petition, and not to dismiss the Petition.

Part 15 was never intended to be used by a transmitter/antenna system having a Radio Frequency footprint the size of a whole county. And that is exactly what BPL does. This level of potential interference could negate the recent advances in Homeland Security communications - like shooting ones' self in the foot..

Sincerely,

Doug Wilson

Broadcast Engineer
